The Speaker

Dr. Jim Quinn received his undergraduate degree in Physics from Stony Brook University in 1983. He obtained his doctoral degree in Surface Science, also from Stony Brook, in 1992 following research into the crystal structure of metal and semiconductor surfaces. From 1993 to 1994, he was a post-doctoral fellow at the Brookhaven National Laboratory where he was involved as a beam-line scientist at the High Flux Beam Reactor. Since then, Jim has been the Director of Laboratories for Stony Brook in Materials Science and Chemical Engineering. Among his many responsibilities, he teaches laboratory courses, specializing in metrology, microscopy, spectroscopy, diffraction, and their instrumentation.

The Topic

From his childhood, college education, research, and brief patriotic career, Henry Moseley set the stage for major advances in atomic and solid-state physics, materials science, chemistry, geosciences, etc...Henry unlocked the mystery of electrons, x-rays, and the periodic table. Follow the history of Henry Moseley, the unsung hero from 100 years ago.
