Our Speaker

Dr. Joanna Ingraham is currently a Brookhaven National Laboratory Intergovernmental Program Analyst with the Nuclear Test Personnel Review Program at the Defense Threat Reduction Agency (DTRA), Fort Belvoir, Virginia. Her previous DTRA assignments include leading the Science and Technology Division in the Advanced Systems and Concepts Office and technical support for U.S. Government initiatives in special nuclear materials safeguards and security and arms control treaty verification. Dr. Ingraham has been affiliated with Department of Energy research and operations programs since 1983. She began her engineering career in 1979 at the Pratt and Whitney Aircraft Plant in East Hartford, Connecticut, as a Performance Analysis Engineer. Dr. Ingraham earned degrees in mechanical engineering and energy engineering from the University of Massachusetts at Lowell.

The Topic

The Defense Threat Reduction Agency is the Executive Agent for the Nuclear Test Personnel Review (NTPR) Program that serves veterans who participated in U.S. atmospheric nuclear tests, served with the American occupation forces of Hiroshima and Nagasaki, Japan, or were prisoners of war in Japan at the conclusion of World War II. The NTPR Program has four primary elements designed to assist veterans by providing participant and radiation dose information, conducting historical records research, performing veteran outreach, and supporting independent scientific studies.
